

# AATCC Certified Training Course for Hong Kong and Macau

SGS Hong Kong has the privilege to launch the AATCC training in Hong Kong and Macau. 2 training modules are offered to candidates with different training focuses.

### About AATCC

The American Association of Textile Chemists and Colourists (AATCC) was founded by Dr. Louis Olney of the Lowell Textile School in 1921. The AATCC is the world's leading not-for-profit professional association for the textile design, materials, processing, and testing industries. Association members are employees of textile, apparel, and home goods manufacturers; dye and chemical manufacturers; testing laboratories; consumer and retail organizations; state and federal government agencies; and colleges

and universities. AATCC has thousands of individual and corporate members in more than 60 countries world wide.

The association is internationally-recognized for its standard methods for testing dyed and chemically treated fibres and fabrics to measure and evaluate such performance characteristics as colourfastness to light and washing, smoothness appearance, soil release, shrinkage, water resistance, and the many other conditions to which textiles may be subjected. New and updated test methods are published annually in the *AATCC Technical Manual*. The many aspects of textile wet processing, design, and testing are also covered in handbooks, textbooks, and proceedings of AATCC's workshops, symposia, International Conference & Exhibition (IC&E), monthly magazine, *AATCC Review*, and monthly electronic newsletter, *AATCC News*.
